

Early warning movement sensor

C-track Secure PLUS has an internal movement sensor, allowing it to identify vehicle movement even when the ignition is off.

Watch mode

By just sending an SMS to your C-track Secure PLUS unit, you can ensure that you are immediately alerted while in meetings or shopping, if the vehicle moves, regardless of whether the ignition is on or off.

International Tracking

C-track Secure PLUS operates on GSM in neighbouring countries and the vehicle can be tracked in that country by your cell phone and Web application. Any SMS roaming cost will be for your account.

Optional extras

C-track Secure PLUS can be enhanced with the following optional items:

- Remote wireless Panic Button.
- Crash Sensor activating automatic medical response.
- Remote Immobilisation system to immobilise the vehicle from the DigiCore Support Centre.
- Business/Private remote switch to automatically categorise each trip as either Business or Private while driving.

Stolen Vehicle Recovery Option

What makes the patented C-track Secure so special?

When you fit a C-track Secure vehicle tracking system to your car, you get more than just stolen vehicle recovery - you get control and complete peace of mind!

Insurance Approval

South African Insurance Association (SAIA) approved, qualifying you for reduced insurance premiums.

Emergency

Send a SMS message from your cell phone for emergency or panic assistance.

Locate your vehicle

Send an SMS message from your cell phone to test your C-track Secure in your family or driver's vehicle and to find out where they are.

Daily Health Check

DigiCore Support Centre is notified daily on the functional health of the C-track Secure, so we will let you know if your system is not working.

Latest Location Technology

Patented real satellite tracking technology using GPS & GSM location methods.

Get Direction

Lost? Phone DigiCore's Support Centre 24 hours a day for C-track Secure's accurate GPS based directions.

Advanced Stolen Vehicle Recovery Option

Additional features with C-track Secure PLUS

Cell phone access

Three authorised users can request position, speed and status information via SMS, from the C-track Secure PLUS unit, right down to street and suburb name.

Internet access

Using an Internet connection and the C-track Secure PLUS Web application, users can view the current and historical locations of their vehicles on maps right down to street level.

Electronic logbook

The C-track Secure PLUS Web application automatically creates a very easily maintained SARS accepted electronic Logbook.
